

Tableware Shrink Packaging Machine

This machine efficiently packages tableware using heat shrinking. It ensures a secure wrap, protecting products during transit while providing a professional finish.

Product Overview

Professional Tableware Shrink Packaging Solution

The Jet Shrink Packaging Machine 4525 utilizes an advanced air-jet principle to deliver efficient and energy-saving shrink packaging, reducing energy consumption by over 15%. Designed specifically for tableware, this equipment ensures high-quality results for PVC, POF, and PP shrink films, effectively preventing folding issues common with standard machines. With its adjustable temperature and motor speed, it offers versatile performance for various industrial packaging requirements.

Technical Specifications

| | |
|--------------------|----------------------|
| Voltage | 220V/380V |
| Power Consumption | 8 KW |
| Maximum Load | 10 KG |
| Weight | 90 KG |
| Furnace Size | 900 x 450 x 250 mm |
| Overall Dimensions | 1200 x 610 x 1240 mm |

Performance Metrics

Transmission Speed

10 m/min
Max Speed
