

Tandem Tricycle with Dual Seating

This tricycle is designed for tandem use, featuring two seats and individual pedal systems. Constructed with lightweight metal tubing and equipped with safety flags, it ensures stability and visibility.

Product Overview

Dual-Seat Tandem Tricycle

This human-powered tandem tricycle is engineered for recreational use, featuring a robust dual-seating configuration that allows two riders to experience cycling together. With individual handlebars and independent pedal systems, it offers a collaborative and stable riding experience suitable for diverse skill levels. The lightweight metal frame and pneumatic tires ensure smooth handling and durability across various paved surfaces.

Technical Specifications
