

Tangential Blower with Metal Housing

Tangential blower designed for efficient air circulation. It features a robust black metal housing with mounting points for versatile installation.

Product Overview

High-Efficiency Air Circulation

This tangential blower is engineered for reliable and consistent air movement in demanding environments. Featuring a robust black metal housing, it is built for durability and ease of integration into various systems. The precision-designed internal impeller with multiple blades ensures optimal airflow performance, making it an ideal choice for cooling or ventilation applications requiring directed output.

Technical Specifications

Housing Material	Metal
Housing Color	Black
Blower Type	Tangential

Installation

Mounting Options	Integrated Mounting Points, Versatile Installation
------------------	--

Performance

Airflow Mechanism	Multi-blade internal impeller
