

# Tanker Trailer for Liquid Transport

This tanker trailer is designed for transporting liquids or gases. It features a cylindrical tank with reinforcing ribs, mounted on a multi-axle chassis.

## Product Overview

### Professional Liquid Transport Solution

This heavy-duty tanker trailer is engineered for the efficient and secure transport of various liquids or gases. Featuring a robust cylindrical tank design with reinforcing ribs and a multi-axle chassis, it provides the necessary durability for long-haul industrial applications. The unit includes essential operational features such as landing gear for stable detachment and an integrated ladder system for safe access to the tank top.

## Technical Specifications

Tank Configuration	Cylindrical with reinforcing ribs
Chassis Type	Multi-axle
Application	Liquid Transport, Gas Transport, Heavy-duty

## Operational Features

### Access Equipment

- Integrated ladder for top access
- Landing gear for detached support

### Safety Markings

Orange identification stripe
