Product Overview

Professional Threading Solution

This comprehensive threading kit is engineered for precision, featuring high-speed steel construction suitable for demanding metalworking environments. It is capable of cutting threads in steel, stainless steel, heat-resisting steel, and forging steel. With a versatile range of metric and inch-sized tools, this set provides a complete solution for creating or repairing internal and external threads.

Technical Specifications

Included Components

- Tapered taps
- Plug taps
- External threading dies
- Adjustable tap wrench
- Die stock handle
- Fitted metal storage case

Compatible Materials

Carbon Steel • Stainless Steel • Heat-Resisting Steel • Forging Steel

Material	High-Speed Steel (HSS)
Included Metric Sizes	M3, M4, M5, M6, M8, M10, M12
Total Pieces	17 pieces
