

Tape Wrapping Machine for Coils and Inductors

This machine efficiently applies adhesive tape to various components. It is suitable for wrapping coils in transformers, relay coils, and similar applications.

Product Overview

Precision Tape Wrapping Solution

This tape wrapping machine is designed for the efficient application of adhesive tape onto various components, including transformers, relay coils, and inductors. Featuring a robust mechanical design, it ensures consistent tension control for precise wrapping results. The machine is compact and user-friendly, making it an ideal choice for both small-scale assembly and high-volume production environments.

Technical Specifications

Model	SLP-98
Machine Dimensions	240 x 50 x 210 mm
Net Weight	2 kg

Certifications

Quality Certifications	CE, ISO 9001
------------------------	--------------

Application Details

Compatible Components

- Transformers
- Relay Coils
- Toroidal Cores
- Inductors
