

Tapered Edge Grinding Wheel

Abrasive grinding wheels feature a tapered profile on one side. They are designed for precision grinding and shaping of various materials and are suitable for use on bench grinders and pedestal grinders.

Product Overview

Professional Tapered Grinding Solutions

These abrasive grinding wheels feature a precision-engineered tapered profile on one side, specifically designed to enhance control during material removal and shaping tasks. Ideal for both rough stock removal and fine finishing, the tapered geometry provides superior access to tight spaces that standard wheels cannot reach. These high-performance wheels are fully compatible with bench and pedestal grinders for a versatile range of industrial applications.

Technical Specifications

Dimensions (DxTxH)	125 x 25 x 32 mm
Grit Specification	A60P
Design Profile	Tapered One Side, Precision Abrasive

Compatibility

Compatible Equipment

- Bench Grinders
- Pedestal Grinders
