

Tapered Rock Drill Bit

These tapered rock drill bits are available in 7°, 11°, and 12° configurations. Constructed with durable materials and carbide inserts, they offer enhanced wear resistance and extended service life.

Product Overview

Professional Tapered Rock Drilling Solutions

These tapered rock drilling tools are engineered for efficient and precise drilling across a variety of rock formations. Featuring robust carbide inserts and durable construction, they ensure optimal energy transfer and long service life. The system provides versatile configuration options to meet the rigorous demands of professional drilling projects.
