

Tapered Roller Bearing

This high-quality tapered roller bearing is designed for demanding applications. It features precision-engineered rollers and races to provide optimal load distribution and smooth operation.

Product Overview

High-Performance Tapered Roller Bearing

This high-quality tapered roller bearing is engineered for demanding industrial and automotive applications. Featuring precision-engineered rollers and races, it ensures optimal load distribution and exceptionally smooth operation. Designed to handle significant radial and axial loads, this component provides reliable performance and an extended service life in heavy-duty machinery.

Technical Specifications

Load Handling

High Radial Load • High Axial Load

Design Features

- Precision-engineered rollers
- Optimized race geometry
- Enhanced load distribution
- Extended service life construction

Suitable Applications

Automotive, Industrial Machinery, Heavy Equipment
