

Taphole Drill Bit for Rock Drilling

This taphole drill bit is designed for demanding drilling applications. Its robust construction ensures extended tool life and efficient material removal.

Product Overview

High-Performance Taphole Drill Bit

This taphole drill bit is engineered for demanding rock drilling applications, offering robust construction for extended tool life and efficient material removal. Designed for precision and reliability, it ensures optimal performance even in challenging geological conditions. It is a professional-grade solution suitable for various rock drilling operations.

Technical Specifications

Diameter Range	38mm - 70mm
Available Bit Shapes	Carbide 3-blade, Steel cross bit, Carbide cross bit, Button bit

Logistics & Capacity

Monthly Productivity

10000 pcs
Units per Month

Packaging

- Wood case
- Carton
