

TB43 Gasoline Engine

The TB43 gasoline engine is designed for various applications requiring a compact and powerful power source. This engine features a robust construction for durability and long-lasting performance.

Overview

TB43 Gasoline Engine

The TB43 is a compact and powerful gasoline engine designed for reliability in demanding handheld equipment applications. Engineered for efficiency, it features a robust construction that ensures long-lasting performance and smooth operation. This engine is an ideal power source for trimmers, brush cutters, and similar outdoor power tools.

Performance Metrics

Maximum Power

1.25 kW
Max Power

Rated Speed

6500 r/min

Technical Specifications

Cylinder Diameter	40 mm
Discharging Capacity	42.7 cc
Carburetor Type	Diaphragm

Physical Characteristics

Fuel Tank Capacity	1.2 L
Net Weight	4.2 kg
