

TC5515 8T Stationary Tower Crane

The TC5515 is a tower crane with a maximum load capacity of 8 tons and a 55-meter jib. It can be configured as a stationary, inner-climbing, external climbing, or traveling tower crane.

Overview

High-Performance Stationary Tower Crane

The TC5515 8T Stationary Tower Crane utilizes advanced digital frequency modulation technology to meet global construction standards. Designed for versatility, this unit supports stationary, inner-climbing, external climbing, and travelling configurations, making it an ideal choice for high-rise building projects. It is a proven solution in international markets, offering reliable lifting capacity for complex vertical construction tasks.

Technical Specifications

Maximum Lifting Capacity

8 t

Max Load

1.5 t

Tip Load

Jib Length	55 m
Free Standing Height	44 m
Mast Section Dimensions	1.6m x 1.6m x 3.0m

Operations

Supported Configurations	Stationary, Inner-climbing, External climbing, Travelling
