System Overview

Advanced TCP/IP Video Intercom Solution

This professional-grade digital intercom system utilizes TCP/IP protocol over CAT5/CAT6 cabling for reliable villa and apartment communication. The system features Power over Ethernet (PoE) support for simplified installation and integration across security, surveillance, and access control. Designed for high performance, it offers high-definition video, mobile app connectivity, and scalable support for diverse residential environments.

Technical Specifications

Connection Interface	TCP/IP, PoE, CAT5/CAT6
Mobile Compatibility	iOS, Android, Remote Call
Warranty	1 Year

Key Features

Core Functionalities

- High Definition Video Communication
- Image Memory and Video Recording
- Intercom between rooms and apartments
- Guard station connectivity
- Alarm and Surveillance integration
- Touch screen interface
