

Tea Beverage Production Line

This tea beverage production line processes raw materials from tea leaves or tea powder. It supports production of green tea, black tea, herbal tea, flower tea, and milky tea.

ADDITIONAL IMAGES

Product Overview

Comprehensive industrial processing setup designed for high-hygiene tea beverage production.

Industrial Tea Beverage Processing System

This advanced beverage production line is designed to facilitate high-capacity manufacturing for various tea-based products. Utilizing a comprehensive sequence from extraction to sterilization and aseptic filling, the system ensures high product quality and adherence to strict hygiene standards. It features versatile processing capabilities suitable for both leaf-extracted and powder-dissolved tea formulations.

Technical Capabilities

Processing Capacity

2000 L/D

Minimum Capacity

200000 T/D

Maximum Capacity

Product Compatibility

Tea Categories

Green Tea, Black Tea, Herbal Tea, Flower Tea, Milky Tea

Manufacturing Specifications

Raw Material Methods

- Extraction from tea leaves
- Tea powder dissolving

Packaging Options

Compatible Package Formats

Tetrapak • PET Bottles • HDPE Bottles • Glass Bottles • Plastic Pouches • Stand-up Pouches • Gable Top Box
