

Tea Vacuum Sealing Machine

This machine is designed for the efficient vacuum sealing of tea products. It removes air from packaging to ensure freshness and extend product shelf life.

Product Overview

Professional Tea Vacuum Packaging

The DT300 is a high-performance vacuum packaging machine specifically engineered for products with high moisture content, such as tea. Utilizing advanced Japanese control circuitry and a micro-computer interface, it ensures reliable and precise operation. Its robust 304 stainless steel construction meets food hygiene standards, offering a durable and easy-to-clean solution for commercial packaging environments.

Technical Specifications

Model	DT300
Construction Material	304 Stainless Steel

Key Features

Device Advantages

- Waterproof and moisture-proof design
- Tilt table for liquid-rich products
- Micro-computer controller
- High durability and low failure rate
- Easy to clean and maintain

Compliance & Quality

Standards	Food Hygiene Standard, Waterproof
