

Technical Specification Machine Tools

These machine tools come with varied technical specifications. The specifications detail dimensions, processing capabilities, power, and structural parameters.

Overview

High-Performance Machine Tools

These professional-grade machine tools are engineered for heavy-duty industrial processing, offering a wide range of capabilities to suit diverse manufacturing requirements. With robust motor power options up to 37kW and maximum processing weights reaching 26,000kg, these machines provide the stability and force needed for precise, demanding operations. The series features versatile workbench dimensions and advanced speed controls, ensuring flexibility for various workpiece sizes and material handling needs.

Performance Metrics

Motor Power Range

22 kW

Minimum Power

37 kW

Maximum Power

Max Processing Weight

10000 kg

Min Capacity

26000 kg

Max Capacity

Technical Specifications

Permissible Rack Pull	51000 N
Stroke Speed	0.03-40 m/min (Stepless)
Beam Lifting Speed	0.2-12 mm/min (Stepless)
