

Telescopic Antenna with Magnetic Base

This telescopic antenna is designed for receiving signals across a 45-903MHz channel. Its magnetic base allows for easy and secure mounting to metallic surfaces.

Overview

Versatile Telescopic Antenna

This telescopic antenna is designed for reliable signal reception across a wide frequency range. Featuring a convenient magnetic base, it allows for secure and flexible mounting on metallic surfaces. Its adjustable design and durable construction make it an ideal choice for various communication applications requiring consistent performance.

Technical Specifications

Signal Gain

13 dB

Min Gain

15 dB

Max Gain

Frequency Range	45-903 MHz
Output Impedance	75 Ω
Power Input	DC 12V

Installation & Physical

Available Cable Lengths

- 3m
- 4.5m
- 5m

Mounting Method

Magnetic Base

Dimensions	50 x 31 x 33.5 cm
Gross Weight	17 kg
