

Telescopic Anvil Loppers with Aluminum Handles

These anvil loppers feature telescoping handles for extended reach during pruning. The high carbon steel blade ensures clean cuts, while the lightweight aluminum handles and comfortable grips reduce user fatigue.

Product Overview

Professional Telescopic Anvil Loppers

These telescopic anvil loppers are designed for efficient pruning of tree branches and shrubs. Featuring a durable high carbon steel blade, they provide clean, precise cuts with minimal effort. The lightweight aluminum handles and ergonomic grips help reduce user fatigue during extended gardening sessions, while the adjustable length allows for versatile reach in various landscaping tasks.

Technical Specifications

Blade Material	High Carbon Steel
Handle Material	Aluminum
Key Features	Telescopic, Anvil Action, Ergonomic Grips, Adjustable Length

Application

Recommended Uses

- Tree pruning
- Shrub maintenance
- Landscaping
- Hard-to-reach branch cutting
