Overview

Professional Aerial Work Solution

This telescopic boom aerial work truck is designed for versatile elevated access in urban and industrial environments. Featuring a robust chassis and a reliable articulated boom system, it provides a stable platform for maintenance, repair, and infrastructure tasks. With a 14-meter working height and integrated safety features, it offers an efficient solution for telecommunications, power distribution, and general building maintenance.

Chassis & Engine

Engine Power	141 hp
Displacement	3760 cc
Cabin Configuration	Double row, 2+3 seats, Air conditioner, Power steering

Performance Metrics

Performance Metrics

14 m

Max Working Height

6 m

Max Working Radius

Load Capacities

Capacity Type	Max Limit
Bucket Load	200 kg
Crane Lifting	990 kg

Boom System

Boom Configuration	3-section articulated boom
