

Telescopic Boom Lift 16m Max Height

This telescopic boom lift offers a maximum working height of 16 meters and horizontal reach of 8 meters. It is equipped with four-wheel drive and oscillating axles for maneuverability on uneven terrain.

Overview

Professional Telescopic Boom Lift

This high-reach telescopic boom lift is engineered for demanding construction, industrial, and maintenance environments. It provides significant operational flexibility with a maximum working height of 18.1 meters and an impressive horizontal extension of 12.9 meters. With its robust 4WD drive system and continuous 360-degree turntable rotation, the machine ensures efficient maneuverability and precise access to elevated work areas for professional operators.
