

Telescopic Boom Lift Vehicle

This is a specialized vehicle with a telescopic boom lift for elevated work. It is built on a heavy-duty truck chassis with a custom lift mechanism.

Product Overview

Telescopic Boom Lift Vehicle

This specialized vehicle is engineered for high-reach operations, featuring a robust telescopic boom lift mechanism mounted on a heavy-duty chassis. Designed for versatility, it is suitable for demanding tasks in construction, infrastructure maintenance, and emergency rescue services. The unit provides stable, elevated access, ensuring efficiency and safety for personnel working at height.

Technical Specifications

Model Series	144C
Engine Power Output	420 HP
Chassis Configuration	Heavy-duty truck chassis

Operational Capabilities

Equipment Features

- Integrated personnel basket
- Heavy-duty boom assembly
- High-reach capability
- Stable platform design

Lift Mechanism	Telescopic Boom
Primary Applications	Construction, Infrastructure Maintenance, Emergency Rescue, Elevated Work
