

Telescopic Boom Truck Crane

This heavy-duty crane is mounted on a truck chassis and features a hydraulic boom extension system. It is suitable for construction, infrastructure, and industrial applications requiring long reach and precise load placement.

Product Overview

High-Reach Versatility

This heavy-duty telescoping boom crane is mounted on a rugged truck chassis, designed to deliver high-performance lifting for demanding industrial and construction environments. It features an advanced hydraulic boom extension system that ensures precise load placement and extended reach. Built with safety in mind, the unit is integrated with essential systems like overload protection and stability control to ensure secure operation in complex infrastructure projects.
