Overview

Professional Drywall Sanding Solution

This telescopic drywall sander is engineered for professional surface preparation, featuring a versatile design that adapts to various working environments. With an integrated dust extraction system and LED lighting for low-light conditions, it ensures a cleaner, more precise workspace. The tool offers high adaptability through its interchangeable sanding pads and variable speed control, making it suitable for both walls and ceilings.

Technical Specifications

Power Input	710 W
Voltage Compatibility	110-120V/60Hz, 220-240V/50Hz
Grinding Disc Diameter	225 mm
