

# Telescopic Elevator for Crane

This telescopic elevator is designed for installation in cranes and other agricultural machinery. It features a sliding mechanism for adjustable height and is manually operated with a T-handle.

## Overview

### Telescopic Elevator for Crane

This telescopic elevator is engineered specifically for agricultural construction machinery, providing a reliable solution for crane height adjustment. Featuring a robust metallic construction, it offers excellent durability and resistance to harsh environmental conditions. The design includes a manual T-handle mechanism, ensuring precise and efficient operation for raising and lowering materials on site.

## Technical Specifications

### Available Material Thickness

- 1.5 mm
- 2.0 mm

### Primary Application

Agricultural Machinery • Crane Equipment

### Operation Type

Manual T-handle mechanism

### Design Features

Telescopic, Sliding Mechanism, Metallic Finish
