

Telescopic Hydraulic Bottle Jack

Hydraulic bottle jacks feature a telescopic extension for increased lifting range. They are available in capacities from 2-ton to 12-ton for automotive, construction, and industrial applications.

Product Overview

Telescopic Hydraulic Bottle Jack

This telescopic hydraulic bottle jack provides a robust and reliable lifting solution engineered for automotive repair, construction, and industrial maintenance. The telescopic design significantly increases the extension range, allowing for greater versatility when lifting heavy loads. Each unit is equipped with integrated overload protection to ensure safety and durability during high-demand operations.

Technical Specifications

Safety Features

Overload Protection • Telescopic Extension

Suitable Applications

- Automotive Repair
- Construction
- Industrial Maintenance

Lifting Capacity Range

2 ton

Minimum Capacity

12 ton

Maximum Capacity

Available Capacities

2-ton, 4-ton, 6-ton, 12-ton
