

Telescopic Hydraulic Cylinder

This telescopic hydraulic cylinder is designed for heavy-duty applications. The multi-stage cylinder extends to a considerable length while retracting to a compact size, suiting it for space-constrained environments.

Product Overview

Heavy-Duty Telescopic Cylinder

This multi-stage hydraulic cylinder is engineered for demanding heavy-duty applications where space is at a premium. Its telescopic design allows for a significant vertical stroke length while maintaining a compact collapsed footprint, ensuring versatility in constrained environments. Built with high-strength materials and precision-machined components, it delivers consistent, reliable performance and long-term durability under rigorous operating conditions.

Technical Specifications

Model Number	4TG-FC179-5700
Key Features	Multi-stage, Telescopic, Heavy-duty, Corrosion resistant

Performance Metrics

Performance Highlights

4 count
Stages

Construction & Integration

Finish	Red coating for corrosion resistance and visibility
System Integration	Equipped with standard hydraulic fittings for easy installation
