

Telescopic Lopping Shear with High-Carbon Steel Blades

This lopping shear is designed for efficient pruning of branches and shrubs. It features high-carbon steel blades for clean cuts and telescopic aluminum handles for extended reach.

Overview

Professional Telescopic Lopping Shear

This professional-grade lopping shear is engineered for the efficient pruning of branches and shrubs in gardens and landscapes. It features high-carbon steel blades that ensure clean, precise cuts for woody plants. The design incorporates telescopic aluminum handles for extended reach and ergonomic grips to minimize hand fatigue during prolonged use.

Technical Specifications

Blade Material	High-Carbon Steel
Handle Material	Aluminum
Key Features	Telescopic Handle, Ergonomic Grip, Lightweight, Durable

Applications

Suitable For

- Tree maintenance
- Shrub pruning
- Landscaping
- Woody plant trimming
