

Telescopic Lopping Shears with High-Carbon Steel Blades

These lopping shears are designed for efficient branch cutting. They feature high-carbon steel blades and telescopic handles.

Product Overview

Professional Telescopic Lopping Shears

These professional-grade anvil lopping shears are designed for efficient branch cutting in gardens and orchards. Featuring a high-carbon SK5 steel blade with a non-stick coating, they provide a clean, precise cut that promotes healthy plant growth. The lightweight aluminum telescopic handle, combined with a 6-step lever mechanism, allows for extended reach and reduced user fatigue during operation.

Technical Specifications

Cutting Capacity

35 mm

Max Cutting Diameter

Maximum Length	970 mm
Blade Material	High-Carbon SK5 Steel
Blade Coating	Non-stick

Design & Features

Mechanism Features

- Gear action for increased cutting power
- 6-step lever telescopic mechanism
- Locking pin for secure extension

Handle Material	Lightweight Aluminum
Applications	Gardening, Orchards, Tree Pruning, Shrub Maintenance
