

Telescopic Pole Saw for Tree Pruning

This telescopic pole saw has an adjustable length, making it suitable for reaching high branches. It features a sharp saw blade and a rope-operated pruning mechanism for efficient tree care.

Product Overview

Professional Tree Pruning Solution

The PG375 telescopic pole saw is engineered for efficient and safe tree maintenance. Featuring an adjustable length design, it allows users to reach high branches easily while remaining safely on the ground. The integrated sharp saw blade and rope-operated pruning mechanism ensure clean, precise cuts for various garden care tasks.

Model

PG375

Key Features

Primary Capabilities

- Telescopic adjustable length
