Product Overview

Professional Telescopic Tree Pruner

This telescopic tree pruner is engineered for precision maintenance of high-reaching branches. It features a durable aluminum pole extendable to 4 meters, paired with a gear-driven shear mechanism for effortless cutting. The combination of a hard-chromed shear blade and a versatile saw attachment ensures efficiency for both light pruning and heavier branch removal.

Technical Specifications

Maximum Extension Length	4 m
Blade Material & Finish	Hard Chromed Steel, Teflon Coated
Pole Material	Aluminum
Operation Type	Rope-operated pulley system

Performance Metrics

Core Features

- Precision-hardened blades
- Tempered blade construction
- Dual-tool pruning shear and saw system
- Spring-loaded arm for consistent cutting
