

Telescopic Tree Pruner with Saw

This tree pruner features a dual-function cutting head for both pruning and sawing. It is equipped with a metallic telescopic cable for extended reach up to 2.25 meters, ideal for cutting high branches.

Product Overview

Versatile High-Reach Pruning Solution

This telescopic tree pruner is engineered for professional landscaping and garden maintenance. Featuring a dual-function design, it seamlessly integrates both a precision cutting blade and a heavy-duty saw to handle varying branch thicknesses with ease. The extendable metallic handle provides necessary reach for dense foliage, ensuring efficient operation at height.
