

# Telescopic Vehicle Antenna

This product is a telescopic antenna designed for vehicles and other electronic devices. Its adjustable length allows for optimal signal reception, and it mounts easily on any surface.

## Product Overview

### Versatile Signal Reception

The JBA-502 is a high-quality telescopic antenna engineered for reliable signal reception in mobile environments. Its adjustable design allows for precise length control, ensuring optimal performance for various communication needs. Featuring a durable black finish and a reinforced base, this unit is built for secure mounting and long-term stability on vehicle surfaces.

## Physical Specifications

Model Number	JBA-502
Color	Black
Design Type	Telescopic

## Features

Installation	Surface Mount
Compatibility	Vehicle, Electronic Device, Mobile Communication
