

Television Circuit Board

This circuit board is designed for use in color television sets. It features various electronic components, including capacitors, resistors, and integrated circuits, with connectivity for wiring harnesses.

Product Overview

Color Television Circuit Board

This high-quality circuit board is designed specifically for color television systems. It integrates essential power supply and signal processing components, including capacitors, resistors, and integrated circuits, to ensure reliable performance. The board features standard wiring harnesses for seamless connectivity within compatible TV units.

Technical Details

Key Components

- Capacitors
- Resistors
- Integrated Circuits
- Wiring Harnesses

Application

Color TV, Main Board, Power Supply

Compatibility

Included Accessories

Remote Control
