

Television with Integrated Speakers

This television comes with integrated speakers. The design incorporates a silver frame and black base.

Product Overview

Integrated Audio and Visual Experience

This television unit features a built-in speaker system flanking the display for enhanced audio performance without the need for external equipment. Designed with a sleek silver-colored frame and a stable black base, it provides a classic aesthetic suitable for various professional or display environments. The integrated design ensures a compact footprint while delivering direct sound projection toward the viewer.
