

Temperature Control Stainless Steel Electric Kettle

This stainless steel electric kettle provides precise temperature control for brewing tea and coffee. It features a digital display, a 1.7-liter capacity, and a keep-warm function.

Product Overview

Professional Grade Temperature Control

This 1.7-liter stainless steel electric kettle is designed for precision brewing, offering selectable temperature settings of 70, 80, 90, and 100°C via an electronic base panel. Its durable construction is paired with advanced safety features, including boil-dry protection and automatic shut-off functionality. The integrated keep-warm feature and 360-degree rotational design provide convenience and versatility for demanding kitchen environments.
