Product Overview

High-Efficiency Cooking Solution

This tempered glass gas cooktop combines modern aesthetics with high-performance engineering to meet professional culinary demands. Featuring advanced Japanese piezo auto-ignition technology, the unit ensures reliable, instant flame activation for every cooking session. The integration of whirlwind burner technology optimizes combustion efficiency, significantly reducing gas consumption while enhancing the longevity of the burners. Its tempered glass surface is designed for durability and allows for effortless cleaning in busy kitchen environments.

Technical Details

Ignition Technology	Japanese piezo auto-ignition
Burner Type	Whirlwind burner
Burner Count	3
Top Surface	Tempered glass

Efficiency Features

Key Benefits	Low gas consumption, Easy cleaning, Consistent heat distribution, Precise flame control
