

# Terrazzo Marble Floor Grinder

This terrazzo marble floor grinder is designed for surface finishing applications. It is smooth and stable to operate, with a collapsible handgrip for safe and comfortable use.

## Overview

Designed for durability and reliability, this machine ensures smooth and level floor finishes.

### Professional Floor Finishing Solution

This high-performance floor grinder is engineered specifically for the precision finishing of marble and terrazzo surfaces. Featuring a robust, stable design with a collapsible handgrip, it ensures both operator comfort and consistent results. The integrated water delivery system effectively manages dust and cools the grinding area, making it an essential tool for high-quality surface restoration and preparation projects.

## Technical Specifications

Robust construction featuring a large circular grinding wheel and integrated water delivery system for dust control.

Model	OKT-200
Weight	45 KG
Main Motor Power	1.5/2/2.5HP
Voltage	220 V

## Key Features

Modern design suitable for residential, commercial, and industrial surface finishing applications.

### Core Features

- Integrated water system for wet grinding
- Collapsible handgrip for storage and transport
- Stable and smooth operation
- New facade design
- Suitable for epoxy floor cleaning and preparation

## Applications

Water-cooled grinding system provides precise material removal for restoration projects.

### Suitable Applications

Marble Grinding, Terrazzo Finishing, Epoxy Floor Cleaning, Surface Preparation, Stone Restoration
