

Textile Cloth Cutting Machines

These textile cloth cutting machines are available in various models. Blade sizes range from 8mm to 260mm, with cutting thicknesses from 2400 to 5600.

Product Overview

High-Performance Textile Cutting Series

This professional series of round cutting machines provides versatile solutions for textile processing, ranging from compact miniature models to high-capacity industrial units. Designed for efficiency and precision, these machines handle varying material thicknesses with ease and reliability. With customizable blade sizes and power configurations, they are suitable for diverse garment and fabric manufacturing environments.
