

Textile Finishing Machine

This machine is designed for the final treatment of textiles, enhancing their quality. It applies finishes to improve texture, durability, and other properties.

Product Overview

Professional Hot Water Solution

This residential gas water heater is engineered for efficient and reliable hot water delivery. The system utilizes a well-insulated cylindrical tank designed to minimize thermal energy loss during operation. Equipped with an integrated combustion chamber and comprehensive safety mechanisms, it provides a stable and controlled heating environment for household requirements.

Technical Specifications

Safety Features

- Temperature and pressure relief valve
- Protective outer shell
- Thermostat control interface
- High-temperature scald warnings

Operational Safety Warning

Water temperatures above 125°F (52°C) can cause severe burns; lower settings are recommended for households with children, elderly, or disabled persons.

Installation

Indoor, Residential, Gas-powered
