

Textile Flatwork Ironing Machine

This high-efficiency flatwork ironer is designed for continuous and precise ironing of textiles. It features a multi-roller system for optimal heat distribution and wrinkle removal.

Overview

High-Efficiency Flatwork Ironing System

This high-efficiency flatwork ironer is engineered for continuous, precise ironing of textiles in demanding environments. Designed for large-scale operations such as hotels, hospitals, and commercial laundries, it features a sophisticated multi-roller system that ensures optimal heat distribution and superior wrinkle removal. With advanced temperature controls and integrated safety mechanisms, this machine provides reliable, consistent performance while ensuring fabric protection and long-term durability.

Technical Specifications

Suitable Applications

- Hotel Laundry
- Hospital Linen Processing
- Commercial Laundry Facilities

Model Identifier	YPI 2800D
Key Capabilities	Continuous Ironing, Multi-roller System, Wrinkle Removal, Fabric Protection

Operational Safety

Safety & Control

Advanced Temperature Control • Safety Mechanisms • Durable Construction
