

Textile Machinery

Textile machinery designed for a variety of textile processing applications. This equipment ensures efficient and reliable textile production.

Product Overview

Industrial Energy Efficiency

This high-efficiency solar panel is designed for seamless integration into small-scale electronic systems or modular energy arrays. Featuring a robust silver frame and a high-density photovoltaic grid, it ensures reliable power generation for industrial and commercial applications. The unit is optimized for durability and consistent performance in diverse environments.

Technical Specifications

Design Type	Square photovoltaic panel
Frame Material	Silver-finished metallic alloy
Cell Configuration	Dark blue grid pattern

Compliance and Quality

Condition
New • Damage-free
