

Textile Machinery Circular Cutting Blade

This circular cutting blade is designed for use in apparel and textile machinery. It features a unique perforated pattern and segmented cutting edges for precise and efficient material processing.

Product Overview

Precision Textile Cutting Solution

This specialized circular cutting blade is engineered for high-performance apparel and textile machinery. Featuring a unique perforated pattern and segmented cutting edges, it is designed for demanding industrial environments requiring precision and efficiency. The robust construction is optimized for reliable cutting and grinding applications across various textile materials.

Technical Specifications

Material Composition

Industrial Grade • High Durability

Blade Design

Circular, Perforated Pattern, Segmented Edges

Mounting Configuration

Central shaft mounting hole

Applications

Key Industrial Functions

- Apparel manufacturing
- Textile machinery cutting
- Material grinding
- Surface polishing
