

Textile Machinery Multifunctional Mounting Bracket

Multifunctional bracket designed for textile machinery, suitable for various lighting and equipment mounting applications. It features adjustable length and versatile mounting options for optimal positioning.

Product Overview

Versatile Textile Machinery Support

This multifunctional mounting bracket is specifically engineered for textile machinery, providing a reliable and adjustable solution for lighting and equipment integration. Its robust design features adjustable length settings and multiple mounting options to ensure optimal positioning for enhanced visibility. Designed for ease of use and time-saving efficiency, this component is an essential upgrade for any textile manufacturing environment.

Technical Specifications

Available Models

- JB-21-01 Adjustable
- JB-21-02 Adjustable
- JB-21-03 Adjustable

Country of Origin

South Korea

Compatible Systems

Single Series, LED Series

Key Features

Performance Benefits

- Adjustable length for custom positioning
- Versatile mounting configurations
- Time-saving installation design
- Secure and stable equipment attachment
