

Textile Machinery Parts Set

Comprehensive set of accessories for water pumps, including impellers, diffusers, impeller sets, jet pipes, jet hoses, fans, and terminal boxes. These components are essential for maintaining and optimizing the performance of water pumps in various applications.

Product Overview

Professional Textile Machinery Pump Accessories

This comprehensive set of accessories is designed to maintain and optimize water pump performance in diverse industrial applications. The kit includes essential components such as impellers, diffusers, jet pipes, and terminal boxes, all engineered for maximum durability and operational efficiency. Ideal for professional maintenance teams looking for reliable spare parts to ensure continuous production and performance.

Technical Components

Included Components

- Impellers
- Diffusers
- Impeller sets
- Jet pipes
- Jet hoses
- Fans
- Terminal boxes

Core Application

Water Pump Maintenance, Textile Machinery, Industrial Pumping Systems
