

Textured Rubber Floor Mat for Automotive Use

Durable rubber floor mats designed for industrial or automotive use. These mats feature a textured red surface with a black border, providing excellent grip and protection for vehicle interiors or workshop floors.

Product Overview

Durable Automotive Protection

These textured rubber floor mats are engineered for demanding automotive and industrial environments. Featuring a robust construction, they provide superior grip and long-lasting protection for vehicle interiors or workshop floors. The distinct design combines a functional textured red surface with a reinforced black border to ensure both safety and durability under heavy use.
