

Thermoelectric Hotel Room Refrigerator

This compact refrigerator utilizes a thermoelectric cooling system, making it silent and eco-friendly. It is designed for hotel use and features low power consumption.

ADDITIONAL IMAGES

Product Overview

Sleek and compact design suitable for any hotel room environment.

Silent & Efficient Hotel Cooling

This thermoelectric refrigerator is engineered specifically for hotel guest rooms, offering a completely silent cooling solution without the vibration of traditional compressors. The unit provides a stable temperature range ideal for storing beverages and snacks, ensuring guest comfort while maintaining energy efficiency. Its compact, sleek design allows for seamless integration into various room layouts and decors.

Technical Specifications

Includes adjustable shelving and an interior light for user convenience.

Unit Dimensions (W x H x D)	420 x 485 x 402 mm
Packing Dimensions (W x H x D)	482 x 546 x 449 mm
Voltage/Frequency	110V or 220V / 50-60Hz

Performance

Energy-efficient cooling featuring an interior fan for even air circulation.

Temperature Range	4.5 to 15 °C
Delta Temperature	20 °C

Key Features

Core Benefits	Silent Operation, Compact Design, Eco-Friendly, Low Power Consumption, Vibration-Free
