

Thermoelectric Wine Bottle Chiller

This thermoelectric cooler chills wine bottles from 3 to 50 degrees Celsius without ice. Infinitely variable temperature control ensures wine is served at the perfect temperature.

Product Overview

Professional Wine Temperature Control

This thermoelectric wine bottle chiller provides precise, vibration-free cooling to ensure your wine is served at its optimal temperature. Designed for versatility, the unit features an infinitely variable temperature range and operates quietly without the need for a compressor. Its compact design and user-friendly digital interface make it an essential tool for high-end dining environments and professional beverage service.

Technical Specifications
