

Thermostatic Gas Water Heater for Residential Use

This gas water heater provides on-demand hot water with thermostatic control. It is designed for residential indoor installation and includes multiple safety features.

Overview

U6 Thermostatic Series

The U6 Thermostatic Series gas water heater is engineered for reliable, on-demand hot water delivery in residential environments. Featuring advanced thermostatic control, this unit ensures precise and consistent water temperatures for enhanced user comfort. Its compact, wall-mounted design optimizes space, while integrated safety mechanisms provide robust protection against overheating and gas leaks.
