Overview

High-Efficiency Temperature Control

This Thermostatic Radiator Valve features a high-precision liquid sensor designed for accurate room temperature regulation in HVAC&R systems. Engineered with over 14 years of research, all key components including the sensor, head, and body are manufactured and calibrated in-house to ensure consistent quality. The unit is certified to EN-215 standards and carries an A-rating energy grade, making it an ideal choice for professional heating installations seeking energy efficiency.
