

Thread Winding Machine

This thread winding machine is designed for efficient and precise winding of thread onto bobbins or spools. It features an adjustable tensioning system to ensure consistent thread winding and a user-friendly control panel for easy operation.

Overview

Precision Thread Distribution

This thread distributing machine is an essential piece of equipment for thread-making, garment, and knitting enterprises. It is designed to efficiently part large pagoda lines into smaller sections on yarn tubes, supporting the simultaneous loading of 2 or 4 small pagoda lines. With its built-in timing function and ability to arrange thread neatly and evenly, it ensures a professional, high-quality finish for your production needs.

Technical Specifications

Distributing Yarn Bobbin Speed

750 r/min
Rotating Speed

Timing Duration	30 min
-----------------	--------

Motor Details

Motor Power	120 W
Motor Rotating Speed	1450 r/min
Voltage	220 V

Operational Capabilities

Concurrent Load Capacity

- 2
- 4

Key Features	Timing Function, Even Thread Arrangement, Multi-Spool Loading
